A Section with a Figure

An ordinary frame

- An item inside an `itemize` environment.
- Another item.
  - A Subitem.
  - Another, slightly longer subitem.
- And, at last, a final item.

A fancy block

This is the `fancyblock` environment provided by *anthem*. It can be customized with *mdframed* options (as seen below).

A special section

About the Special Sections

- You can declare an unnumbered special section using the \specialsection command. This produces a PDF bookmark just like a normal section does.
- These special sections have special section title pages created by the \specialsectionpage{type}, where the "Part ..." is replaced by type.
- Usually, type will be something like "Intermezzo" or "Aside".

An Ordinary Section

Another frame

A fancy figure

1. An item inside an `enumerate` environment.
2. Another item.
   2.1 A Subitem.
   2.2 Another, slightly longer subitem.
3. And, at last, a final item.
